Conditions of Sale

PRICES

In present circumstances orders can only be accepted on the understanding that the prices charged and discounts allowed are those ruling at the date of despatch of the goods.

PAYMENT

A discount of 2½ per cent is allowed for cash received by the end of the month following date of invoice, otherwise strictly net.

CARRIAGE

Carriage is paid on orders of £10 net value. Full trade discount will be allowed on items sent by post or passenger train, but postage or carriage will be charged.

EIRE: Carriage charges from Irish Port to destination, Customs Dues, and Customs Clearance Charges are payable by consignee.

LOSS AND DAMAGE IN TRANSIT

All goods are consigned at sender's risk. Property in the goods passes on delivery to customer, the risk passing with the property. Consignee must notify us and the Carrier in writing of any damage or partial loss within 3 days and, similarly, non-receipt within 14 days from date of advice note or invoice. We cannot accept liability if by reason of failure to give due notice a claim for compensation is not sustained.

PACKING

Cartons are used wherever possible and are free of charge. Wooden cases — where required — are charged at cost and must be paid for in full if not returned.

WARRANTY

All B.S.T. products are fully warranted and will be replaced free of charge if found to be faulty.

"BRADES" **"W.H.S." & "TYZACK 3-LEG"** **BUILDERS' TOOLS**

The individual Companies of William Hunt & Sons The Brades Limited and Joseph Tyzack & Son Limited have been known for generations as the manufacturers of the finest Brick and Plastering Trowels in the country. The Brand Names "W.H.S." and "3-LEG" have long been established bywords with Bricklayers and Plasterers everywhere, some expressing a preference for one brand and some the other. Now that these two great Companies are both operating in the B.S.T. Group the best of manufacturing methods, highly skilled craftsmanship and vast resources are pooled to meet the ever-increasing demand and to enhance still further the quality and finish of this comprehensive range of specialised products.

NOTES

"BRADES SKELTON"

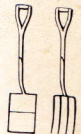

SPADES AND FORKS

The most popular of the former "BRADES" and "SKELTON" patterns have been selected to make up the present range of "BRADES SKELTON" spades and forks. The superior quality and workmanship for which both brands are famous is maintained in current production.

This photograph shows the products arriving from factory into warehouse.

NOTES

"ISAAC NASH" **"FUSSELL" and "BRADES"** **SCYTHES, SLASHERS and HOOKS**

All the articles shown in this section of the catalogue are manufactured at our Belbroughton factory, situated in the middle of a picturesque village in Worcestershire. In this village the craft of Scythe making has been carried on for centuries, and the method of manufacture is basically the same today as it was 100 years ago. Records exist which show that Scythe Blades were made here in the 16th century by the Waldron family and continuously by that family up to the end of the 19th century when Isaac Nash purchased the Waldron business. Our Waldron Brand is still the most important brand sold in the U.S.A. and Irish markets.

Today use is still made of the waterpower derived from the lovely fast-flowing trout stream which passes through the village, and the water-driven tilt hammers are still workable, although they have been replaced by more modern types of hammers and machinery.

Snath Hook or Grass
Nail 1/6 each

"ISAAC NASH" "WALDRON" etc

668

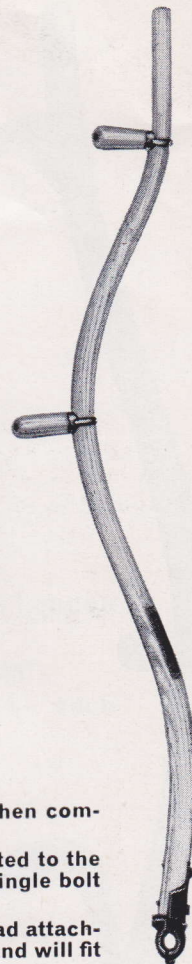

THE "UNIVERSAL" BALL JOINT SCYTHER

The old fixed blade method of attaching Scythe Blade to snead (or snath) becomes obsolete when compared with the "UNIVERSAL" BALL JOINT FITMENT.

By this method a serrated ball is fitted to the tang of the scythe blade, and a hinged housing fitted to the foot of any type of snead. The ball end of the scythe blade fits into the snead housing, and by a single bolt adjustment the blade can be set for any type of mowing.

The "UNIVERSAL" BALL JOINT SCYTHER is supplied ready for immediate use. The scythe snead attachment is interchangeable, and replacement blades can be obtained with ball fitting in all lengths, and will fit accurately into any original housing.

The "UNIVERSAL" BALL JOINT SCYTHER can be quickly dismantled for ease and safety in carrying.

667

667 "Nash" American Scythe Snead with "Universal" Snead Attachment 33/9 each

668 "Nash" "Universal" Attachment only 8/6 each
Packed singly

TYZACK 3-LEG

838 "Slickbits", six bits — one each $\frac{1}{2}$ ", $\frac{5}{8}$ ", $\frac{3}{4}$ ", $\frac{7}{8}$ ", 1", $1\frac{1}{4}$ " — complete with shank and Allen key, in plastic wallet 11/9 per set

Boxed $\frac{1}{2}$ dozen

Component Parts

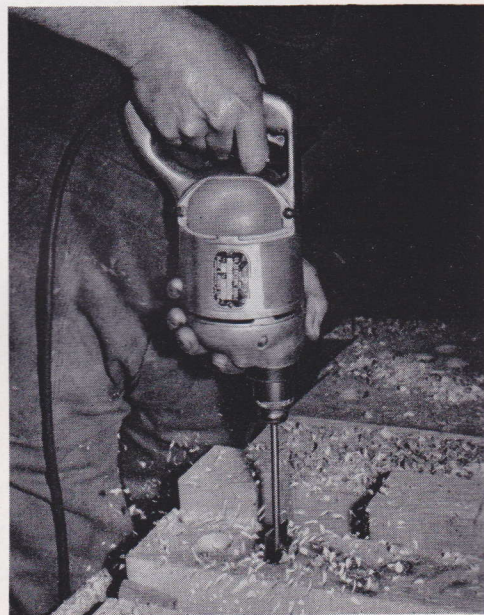

Bits— $\frac{1}{2}$ " and $\frac{5}{8}$ " .. 1/1 each Shank—complete with screw and Allen key .. 3/3 per set
 $\frac{3}{4}$ " and $\frac{7}{8}$ " .. 1/3 " Packed in envelopes containing 6 only of one size

1" and $1\frac{1}{4}$ " .. 1/5 " Orders for lesser quantities cannot be accepted

Will bore holes easily and quickly up to $1\frac{1}{4}$ " diameter with a standard $\frac{1}{4}$ " chuck power drill! Change bits instantly by slackening off Allen screw with key provided; slot bit into shank and tighten!

To re-sharpen, use a fine-cut three-square file, following original bevel.

The "Slickbit" bores a swift clean hole in hard or soft woods—straight grain or end grain—no clogging! Suitable for plasterboard and hardboard, aluminium sheet, and many of the special boards now used in building and the 'do-it-yourself' field.

839

"Screwbits". For use with a standard $\frac{1}{4}$ " chuck power drill—will bore screw hole, shank clearance and countersink in one operation.

Four bits—one each: $\frac{3}{4}$ " 1" $1\frac{1}{4}$ " $1\frac{1}{2}$ "
 For screw gauges: 6/7 8/9 8/9 10/12

Complete with shank and Allen key in plastic wallet 8/- per set

Boxed $\frac{1}{2}$ dozen
